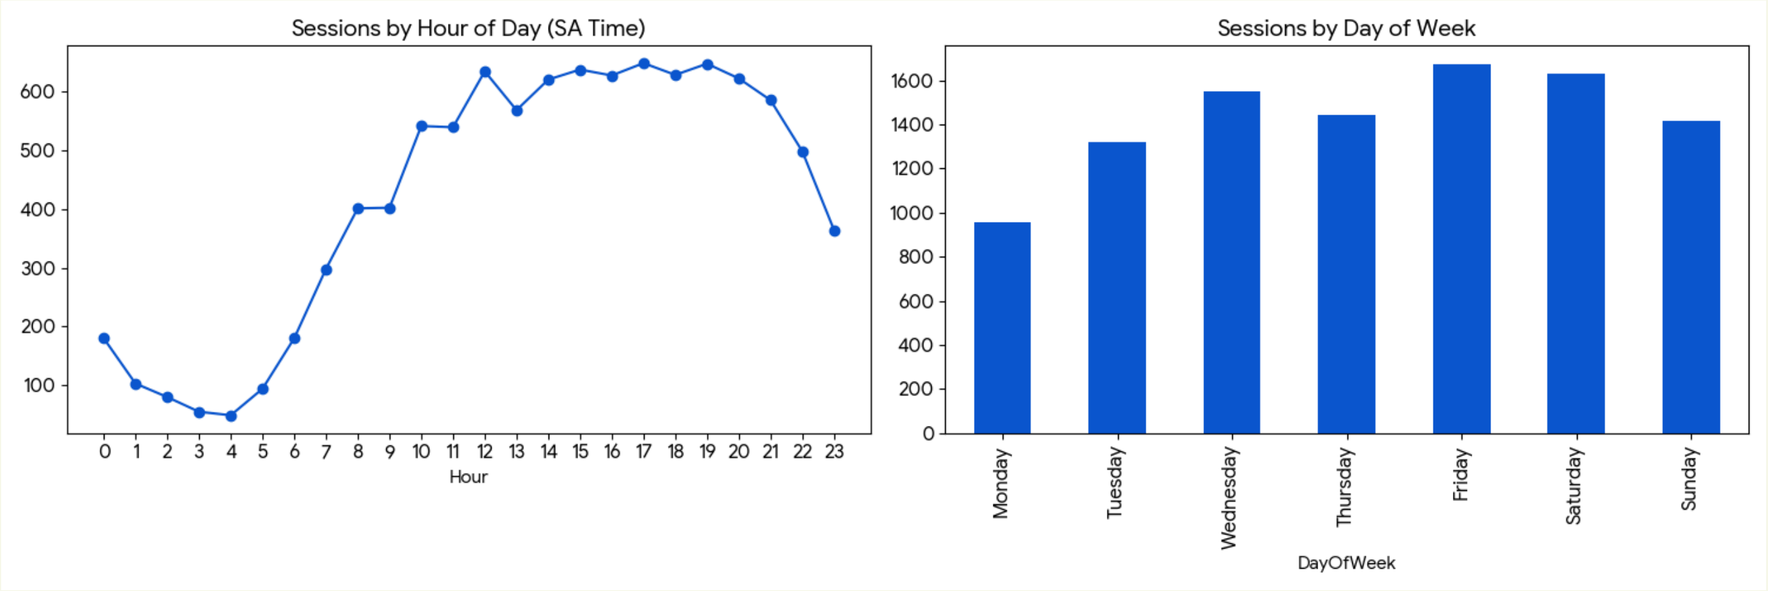
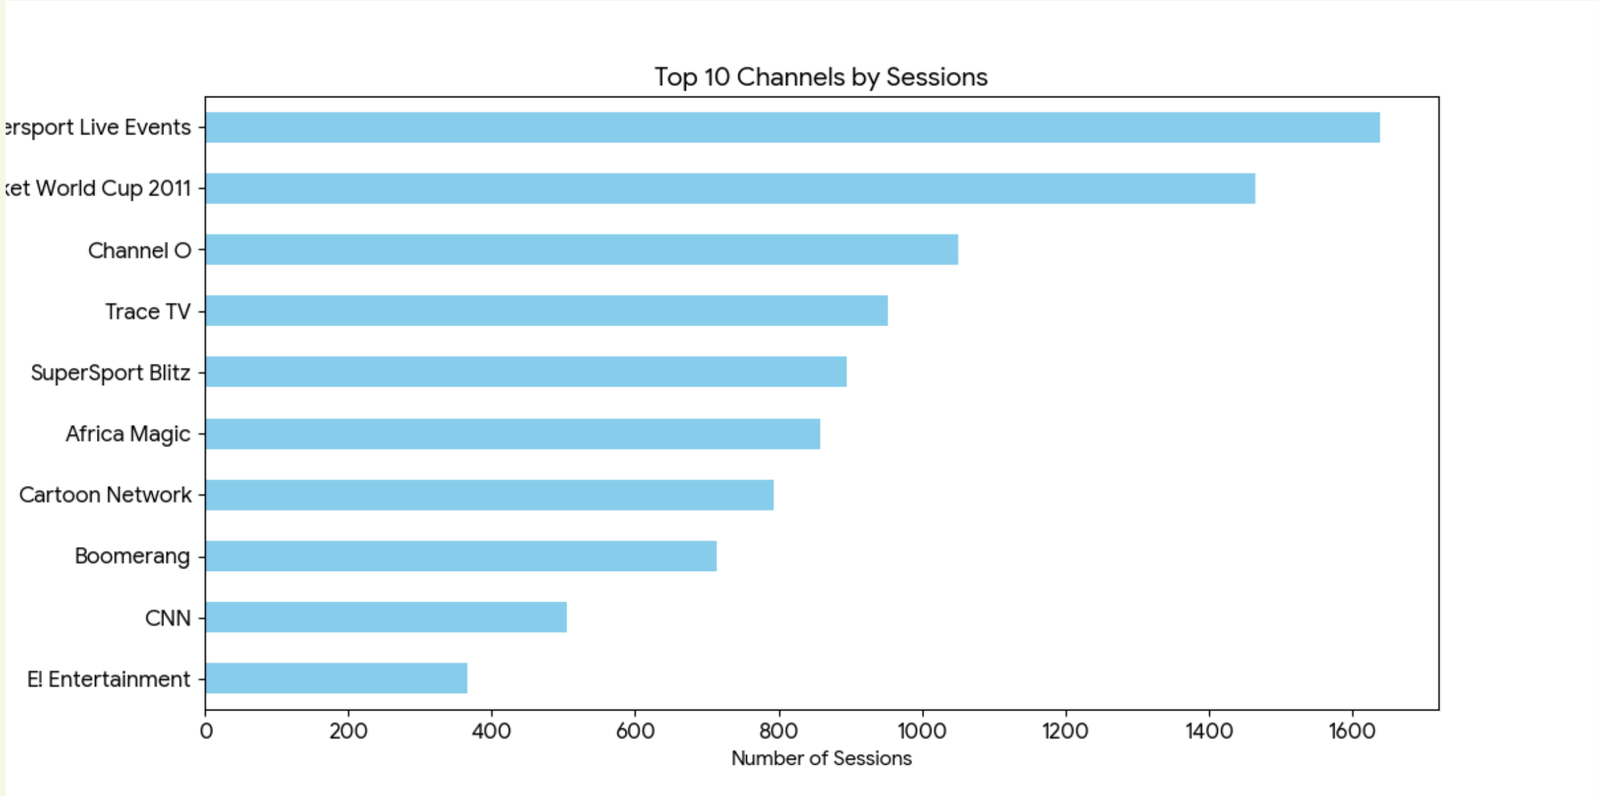
Analyzing the Requirement
I've focused on the CEO's objectives outlined in the BrightTV_Case_Study.pdf. I'm going through the material, which I've found to provide solid guidelines. focusing on aligning with the CEO's goals.
Defining the Analytical Approach
I' I'll focus on extracting user demographics, usage trends across time and channels, and determining consumption factors. I will determine low consumption days and recommend content based on popular trends.

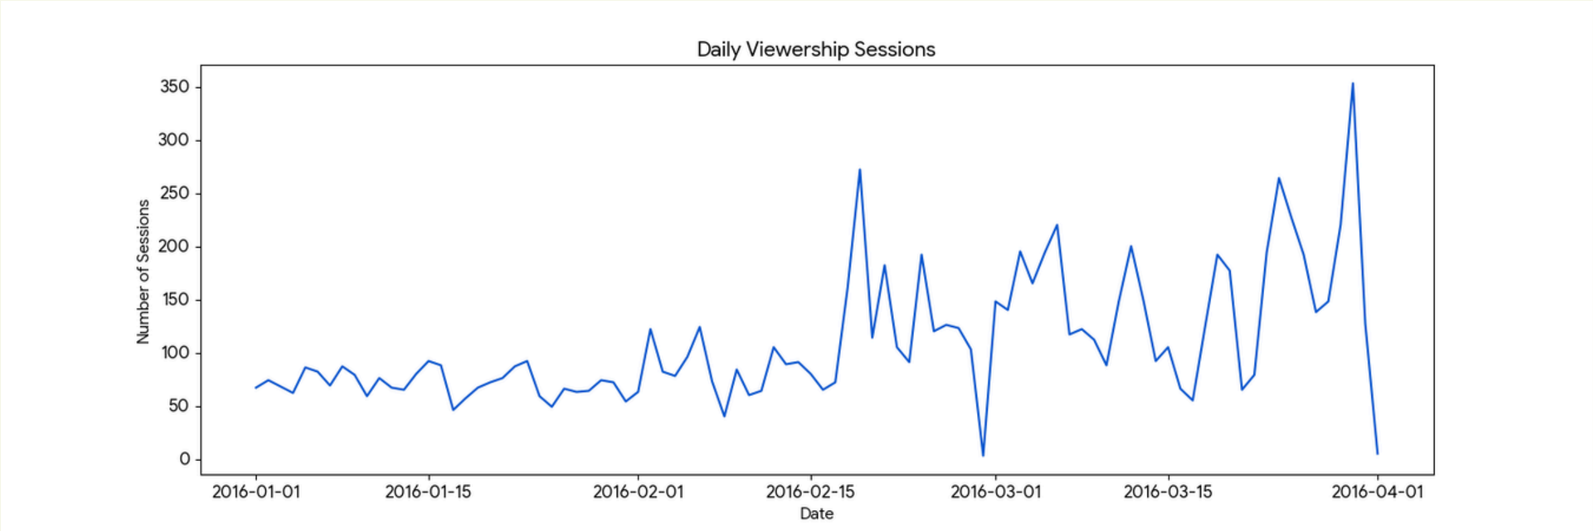
Addressing Data Issues
I've identified some issues within the 'DATE_PART' column. It looks like there are missing values and a mix of data types, so I'm currently working to clean and standardize that. I also need to shift all timestamps to South African Standard Time (SAST), which is UTC+2, as outlined in the requirements.
Analyzing Initial Visualizations
I've successfully generated the initial visualizations and am now analyzing them. Key metrics are readily available, including user demographics (gender and province distributions) and usage trends (daily sessions). I am now exploring more in-depth insights into these metrics.
Constructing Key Insights
I'm now confident I have enough information to proceed with dashboard construction and can highlight key insights. The demographics are revealing: the audience is 90% male, with a substantial Black majority (48.5%), followed by Coloured (18.3%) and Indian/Asian representation.



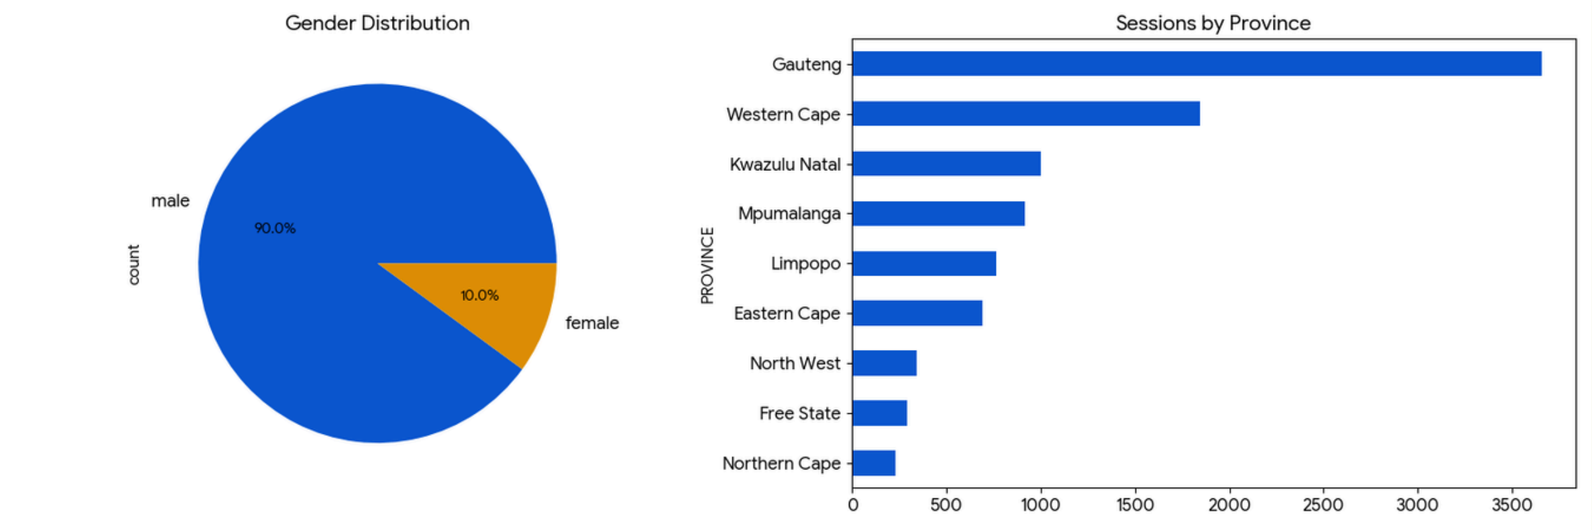
- The "Monday Slump": Monday is the quietest day of the week, with roughly 43% fewer sessions than the Friday peak. This is likely due to a lack of live weekend sports and users' focus on returning to work.
- Prime Time Window: Engagement consistently builds throughout the day, peaking during the 17:00 – 19:00 (SA Time) window. This is the "golden hour" for pushing push notifications or launching new content premieres.



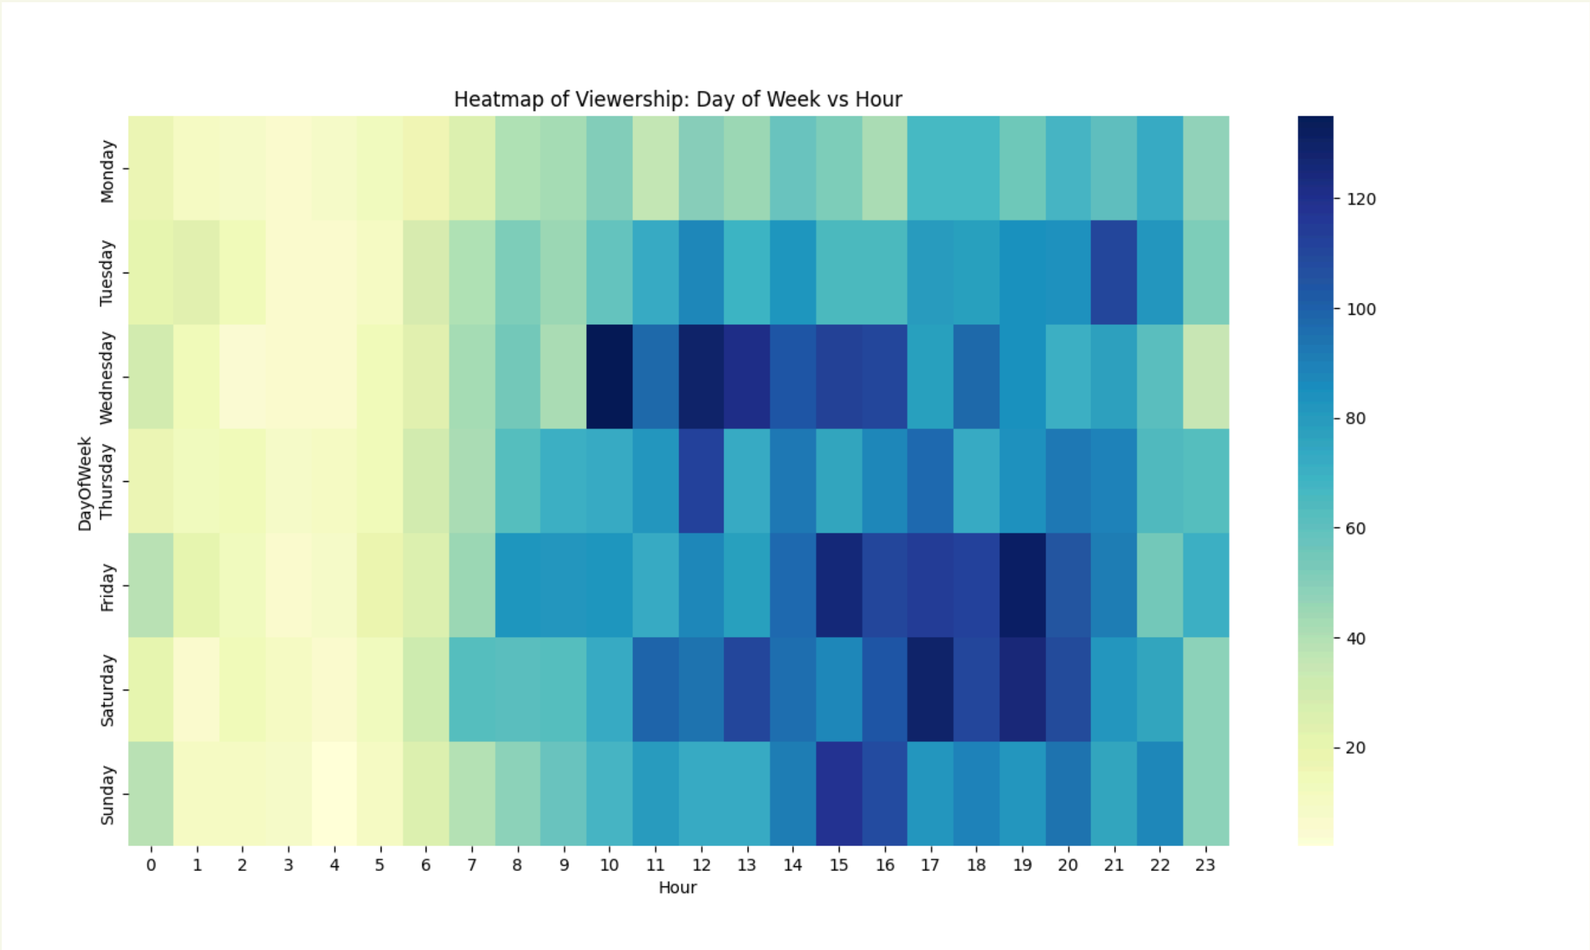
- Sports is King: 3 of the top 5 channels are sports-related (Supersport Live Events, ICC Cricket World Cup, and SuperSport Blitz). This explains the 90% male gender skew.
- Youth Culture Presence: Channel O and Trace TV are the strongest non-sports performers, ranking 3rd and 4th. This indicates a high engagement from younger demographics who enjoy music and urban culture.



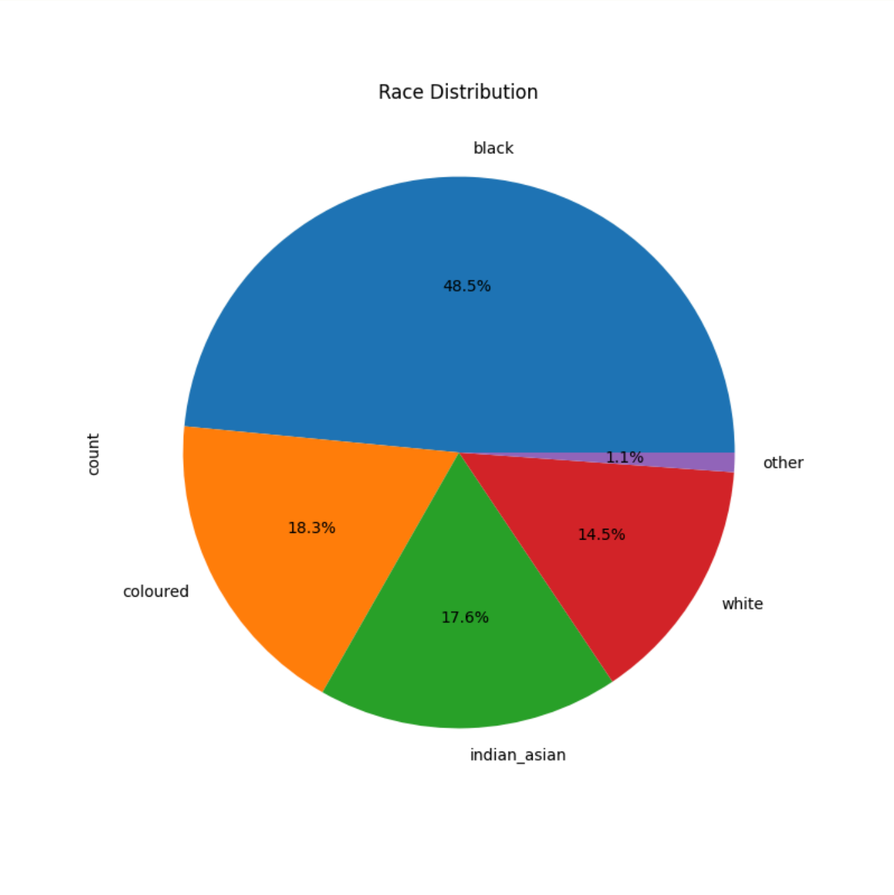
- Event-Driven Spikes: Viewership is not flat; it is highly reactive. The data shows significant peaks that coincide with live sporting events (like the ICC Cricket World Cup).
- Volatility: Days without major live events see a notable drop, indicating that the platform is currently used more as an "event-based" destination rather than a daily habit for many users.



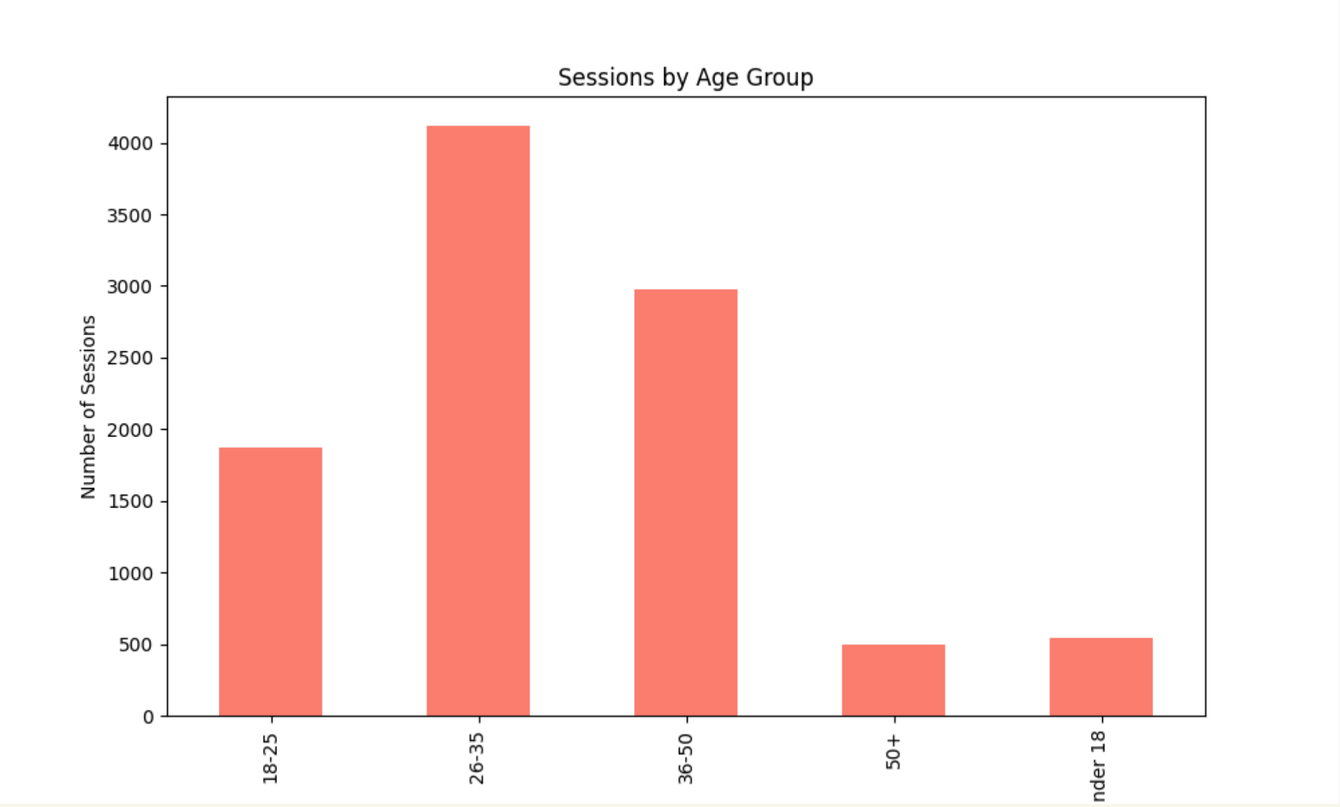
- AGeographic Strongholds: Gauteng is the largest market, followed by the Western Cape and KwaZulu-Natal.
- Racial Diversity: Nearly half of the viewers are Black (48.5%), with balanced representation from Coloured and Indian/Asian communities (~18% each).



- Add Weekly Cycle: Viewership builds up throughout the week, peaking on Friday and Saturday. Monday is consistently the day with the lowest consumption.
- Hourly Patterns: A clear "Prime Time" emerges after work hours, starting from 16:00 and peaking at 17:00-19:00, before gradually declining after 22:00.



Nearly half of the viewers are Black (48.5%), with balanced representation from Coloured and Indian/Asian communities (~18% each).



The core audience is aged 26-50, with the 26-35 segment being the most engaged. bit of body text

Based on the BrightTV viewership data, I have developed a comprehensive analytics dashboard to assist the CVM team in growing the subscription base. All timestamps have been converted to South African Time (UTC+2) as required.

BrightTV Viewership Executive Dashboard

- 1. Key Performance Indicators (KPIs)
- Total Sessions Analyzed: 10,000
- Unique Active Users: 4,386
- Avg. Sessions per User: 2.28
- Peak Viewing Hour: 17:00 - 19:00 (SA Time)
- Top Performing Channel: Supersport Live Events

- 2. User Insights & Demographics
- Gender Bias: The current user base is heavily skewed towards males (90%). This represents a significant opportunity to grow the female subscriber base through targeted lifestyle or drama content.
- PRIMARY AGE GROUP: THE CORE AUDIENCE IS AGED 26-50, WITH THE 26-35 SEGMENT BEING THE MOST ENGAGED.
- GEOGRAPHIC STRONGHOLDS: GAUTENG IS THE LARGEST MARKET, FOLLOWED BY THE WESTERN CAPE AND KWAZULU-NATAL.
- RACIAL DIVERSITY: NEARLY HALF OF THE VIEWERS ARE BLACK (48.5%), WITH BALANCED REPRESENTATION FROM COLOURED AND INDIAN/ASIAN COMMUNITIES (~18% EACH).

- **3. USAGE TRENDS & CONSUMPTION FACTORS**
- DAILY TRENDS: CONSUMPTION REMAINS RELATIVELY STABLE WITH SHARP SPIKES COINCIDING WITH MAJOR SPORTING EVENTS (E.G., ICC CRICKET WORLD CUP).
- WEEKLY CYCLE: VIEWERSHIP BUILDS UP THROUGHOUT THE WEEK, PEAKING ON FRIDAY AND SATURDAY. MONDAY IS CONSISTENTLY THE DAY WITH THE LOWEST CONSUMPTION.
- HOURLY PATTERNS: A CLEAR "PRIME TIME" EMERGES AFTER WORK HOURS, STARTING FROM 16:00 AND PEAKING AT 17:00-19:00, BEFORE GRADUALLY DECLINING AFTER 22:00.

- **4. CONTENT STRATEGY & RECOMMENDATIONS**
- FACTORS INFLUENCING CONSUMPTION:
- LIVE SPORTS: CHANNELS LIKE SUPERSPORT LIVE EVENTS AND SUPERSPORT BLITZ ARE PRIMARY DRIVERS OF HIGH-VOLUME TRAFFIC.
- MUSIC & YOUTH CULTURE: CHANNEL O AND TRACE TV PERFORM STRONGLY ACROSS ALL DAYS, ESPECIALLY AMONG THE YOUNGER DEMOGRAPHIC.
- RECOMMENDATIONS FOR LOW CONSUMPTION DAYS (MONDAY):
- SPORTS HIGHLIGHTS: SINCE SPORTS DRIVE WEEKEND PEAKS, INTRODUCING A "MONDAY NIGHT REVIEW" OR "TOP GOALS/HIGHLIGHTS" SHOW COULD TRANSITION WEEKEND VIEWERS INTO THE NEW WEEK.
- DRAMA MARATHONS: PROMOTE AFRICA MAGIC OR POPULAR SITCOMS ON MONDAYS TO CAPTURE THE AUDIENCE LOOKING FOR "WIND-DOWN" ENTERTAINMENT AFTER THE FIRST WORKDAY OF THE WEEK.
- INCENTIVIZED VIEWING: LAUNCH "MONDAY MYSTERY" REWARDS WHERE ACTIVE USERS ON LOW-CONSUMPTION DAYS EARN LOYALTY POINTS OR ENTRIES INTO MONTHLY SUBSCRIPTION DRAWS.
- INITIATIVES TO GROW USER BASE:
- CONTENT DIVERSIFICATION: TO ADDRESS THE 90% MALE SKEW, INTRODUCE AND MARKET MORE FEMALE-CENTRIC CONTENT (E.G., E! ENTERTAINMENT, LIFESTYLE, AND LOCAL DRAMAS) DURING PEAK HOURS.
- REGIONAL CAMPAIGNS: INCREASE MARKETING EFFORTS IN PROVINCES WITH LOWER PENETRATION (E.G., NORTHERN CAPE AND FREE STATE) USING LOCALIZED CONTENT.
- REFERRAL PROGRAMS: LEVERAGE THE CURRENT HIGH ENGAGEMENT OF THE 26-35 AGE GROUP BY OFFERING "REFER-A-FRIEND" DISCOUNTS, AS THIS DEMOGRAPHIC IS HIGHLY ACTIVE ON SOCIAL MEDIA.
